

**ASSURANCE**  
MEDICATION MANAGEMENT

# The Future of Chronic Care Management (CCM)

**Increase revenue.**  
**Decrease medication complications.**  
**Get home in time for dinner.**

The Assurance Chronic Care management solution combines advanced data-driven technology with personalized patient care to compliantly maximize the financial and clinical benefits of new chronic care management codes.

## How does it work?

1.

Our team of highly trained and experienced pharmacists use our proprietary AI-powered medication database with over 20 years of data to provide a comprehensive 360° medication review for patients enrolled in your CCM program.

Because you can compliantly bill for our time spent with your patient, your practice adds revenue without adding overhead costs.

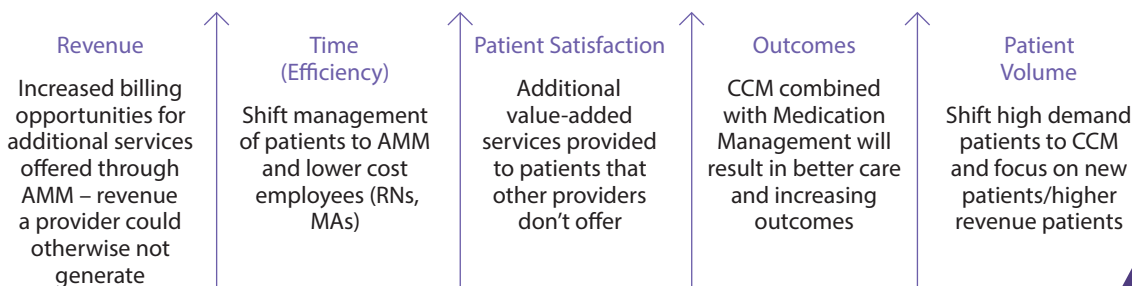

2.

The personal interaction improves patient satisfaction, while our reporting makes outcomes tracking easy.

3.

We know you are busy and overwhelmed. The Assurance turnkey solution is designed to save you time, help you see more patients, help you deliver the highest quality care, and receive compensation for your efforts.

## What's in it for me?

## What makes Assurance so different?

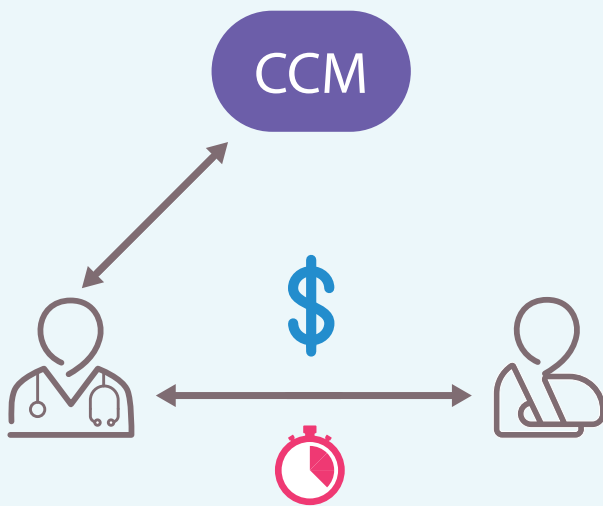

Software alone doesn't save you time, make you more money, nor make your patient's happy.

Assurance embraced the full intention of CCM codes, developed the best software in the industry, and married it with good old fashioned patient interaction.

## We know you don't have extra time. Let Assurance do the work for you – and you get paid!

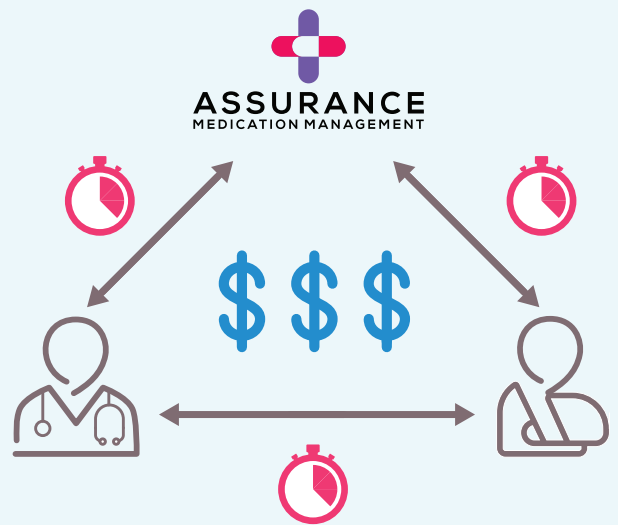

Are you tired of not getting paid for all the staff time your team spends with patients month-after-month? Leave it to Assurance, and we will do the work for you in a fully compliant system. Assurance provides all the documentation to bill using specific CCM codes for the work done both by your practice staff and Assurance in a proven, compliant process.

## The Assurance Solution increases revenue opportunities for providers

### The Old Way

Existing CCM software only allow providers to bill for the time they interact with their patients.

### The Assurance Way

The Assurance solution allows providers to bill for both their time and Assurance's time.
